

## **NOW CHANGING LIGHT FIXTURES TO MATCH HOME AND SEASONAL DÉCOR IS A SNAP**

***Innovative New Technology from SAFETY QUICK LIGHT LLC Makes Home and Seasonal Décor Changes Safe, Quick, and Easy***

**ROSEWELL, GA – July 2006** – Light fixtures or ceiling fans can now be changed to match home and seasonal décor in a snap – literally. Thanks to an innovative, awarding-winning new connection device offered by Safety Quick Light LLC (SQL), light fixtures can be changed as quickly and safely as plugging in a lamp. With the SQL system, hard-wired lighting fixtures and ceiling fans no longer require complicated wiring and two-person installations. New lighting fixtures or fans with the SQL connection device allow homeowners to make changes without professional installation, dramatically altering the way they approach home and seasonal decorating.

Consumers now have many more options for easily changing fixtures and fans that were traditionally viewed as largely permanent. Whether as simple a décor change as a new coat of paint, an entire room makeover, or a complete home renovation, homeowners are able to vary fixtures and fans to match virtually any décor simply and efficiently. The SQL system is so easy to use that changing light fixtures and fans to match new décor or for the change of seasons – spring and summer, to fall and winter can be done without costly professional services. Homeowners can even make holiday décor more festive by adding fixtures with appropriate themes.

The SQL patented device eliminates the restrictions typically associated with permanent connection. It provides both the electrical and mechanical connection in one system, and fits all wall and ceiling canopies. The two-part device consists of a female receptacle which installs into all junction boxes, and a male plug which is pre-

installed in the light fixture or ceiling fan. Once the female receptacle is installed in the junction box, the lighting fixture or ceiling fan requires no additional wiring for installation, and the receptacle never has to be replaced. The fixture or fan plugs into the receptacle by pushing the buttons and literally snapping it in place. Because the system can be used on fixtures rated for indoor and outdoor use, outdoor fixtures can now reflect décor and seasonal changes, as well.

“The ever-growing popularity of do-it-yourself television shows and internet sites focused on the home is proof that people want their biggest investment to reflect who they are, and to be beautiful and welcoming on a budget with which they are comfortable,” says Patricia (Patty) Barron, Chief Operating Officer of Safety Quick Light LLC. “The SQL device creates a whole new way to incorporate indoor and outdoor lighting fixtures and ceiling fans into overall home décor, whether homeowners want to match new decorating themes, change fixtures according to the seasons, or make the holidays more cheerful. Décor and seasonal changes are now truly safe, quick, and easy with SQL.”

The SQL device is available as a complete system in which the male plug is pre-installed into the lighting fixture or ceiling fan. A conversion kit to retro-fit existing fixtures and fans is also available. Lighting fixtures and ceiling fans with SQL can be found at major home center stores as well as marketed by Design Home Solutions, a Ft. Lauderdale-based lighting distributor (supplying retailers in both the US and Canada) and Canarm.

### **About Safety Quick Light LLC**

Safety Quick Light LLC was founded by Rani Kohen in the late 1990s. He is the inventor of the Safety Quick Light (SQL) patented connection device and the company’s President and CEO. The company holds a number of worldwide patents on the unit which is revolutionizing the installation of hard-wired lighting fixtures and ceiling fans and has recently received a variety of final electrical code approvals, including UL and CSA (US and Canadian markets), and CE (European market). Safety Quick Light is available through major home center stores, QVC, HSN, and lighting showrooms. In Canada, it is available through Home Hardware. The company has offices outside Atlanta, in Miami, and China (manufacturing facility).
