

FOR IMMEDIATE RELEASE

NEW 'PLUG AND PLAY" ELECTRICAL CONNECTION DEVICE INCREASES SAFETY, SAVES TIME & MONEY

Safety Quick Light Features New Technology

ROSWELL, GA – JULY 2006 – The innovative, awarding-winning new connection device offered by Safety Quick Light LLC is not only changing the way hard-wired lighting fixtures and ceiling fans are viewed, but improving home and office safety and creating savings, as well. New lighting fixtures or fans with the Safety Quick Light (SQL) connection device pre-installed allows consumers to simply plug in fixtures and fans as safely and easily as plugging in a table lamp – at work or home.

The patented SQL device provides both the electrical and mechanical connection in one system and fits all wall and ceiling canopies. The two-part device consists of a female receptacle that installs into any junction box and a male plug that is pre-installed in the lighting fixture or ceiling fan, allowing safe, quick and easy installation.

The Safety Quick Light technology offers more than just the obvious benefits of ease of use and elimination of the restrictions associated with a permanent connection. Working around a live electrical box to do ordinary things like cleaning, painting, or changing fixtures can be dangerous. Once the SQL Receptacle is installed, lighting fixtures and ceiling fans can be quickly and safely removed for these normal tasks. A cover plate is available for the receptacle when a fixture is not installed. Additionally the receptacle's push-in terminals for making the electrical connection allow fast installation. Homeowners are up and down a ladder in seconds, not standing for endless minutes balancing a fixture while trying to make the electrical connection.

Once the SQL device is properly installed, the chance of accidental shock or electrocution is significantly decreased. The entire receptacle surface is completely safe to touch while live, and fixtures and fans can also be connected to the receptacle while live. There is no need to shut down electrical to plug in the fixture or fan.

Adding the SQL connection device to any electrical outlet in homes and offices also saves money. Once the system is installed, the female connector never needs to be taken down or reinstalled. Installing new lighting fixtures, ceiling fans, or changing them will not require the costly services of an electrician. The SQL system is so efficiently designed that buying select new fixtures and fans with SQL pre-installed will not cost any more at retail. And because SQL is also available as a conversion kit, virtually any existing lighting fixture or ceiling fan can be retro-fitted.

The SQL device is both UL-Listed and CSA Certified. Because the system can also be used on fixtures rated for outdoor use, the ease with which outdoor lighting fixtures and ceiling fans can be removed is another important benefit.

"After seeing the devastation of the 2005 hurricane season, we knew that our product would help homeowners and businesses reduce losses as well as the danger from flying objects and broken glass, because it provides a safe, quick, and easy way to remove outdoor fixtures or fans," says Rani Kohen, inventor of the SQL device and President and CEO of Safety Quick Light LLC. "This product is unique in that it brings complicated wiring and two-person installation of hard-wired fixtures to an end while increasing safety and money-savings in so many important ways," he continues.

The SQL device is available as a complete system in which the male plug is pre-installed into select new lighting fixtures and ceiling fans. A conversion kit to retro-fit existing fixtures (up to 50 lbs.) and ceiling fans (up to 35 lbs.) is also available.

About Safety Quick Light LLC

Safety Quick Light LLC was founded by Rani Kohen in the late 1990s. He is the inventor of the Safety Quick Light (SQL) patented connection device and the company's President and CEO. The company holds a number of worldwide patents on

the unit which is revolutionizing the installation of hard-wired lighting fixtures and ceiling fans and has recently received a variety of final electrical code approvals, including UL and CSA (US and Canadian markets), and CE (European market). Safety Quick Light is available through major home center stores, QVC, HSN, Home Hardware and lighting showrooms. Lighting fixtures and ceiling fans with SQL will also be marketed by Design Home Solutions, a Ft. Lauderdale-based lighting distributor supplying retailers in both the US and Canada. SQL has offices outside Atlanta, in Miami, and China (manufacturing facility). For more information, please visit Safety Quick Light online at www.safetyquicklight.com or call 1-866-885-4649.
